Placement related to the program of study rate calculations:

Completer: An individual that exits the program prior to graduation for a related position.

Graduate: A student that has successfully met all of the requirements of the program including maintaining a minimum of 90% attendance and a GPA above 2.0.

The total of the Completers/Graduates creates the denominator for the equation.

The numerator is comprised of students who:

- Obtained a position in a related field
- Enlisted in the Military
- Enrolled in Continuing Education

Graduate/completers excluded from the placement calculations include:

- Graduate completers whom are unable to enter the workforce due to such instances as death, medical situations, or incarceration.
- Graduate completers for whom the institution has documented evidence that the completers failed to keep interview appointments, enrolled in the program of instruction strictly for personal use, or simply refused an employment offer in the field of instruction.

Placement rates are calculated annually and must be reported to our accrediting body, Council on Occupational Education.

A general overall placement rate calculation also include graduate completers employed in positions not related to the program of study.
