

Outstanding Business Partner- Orrvilon

Located in Orrville, Orrvilon supplies a wide range of industries including aerospace, automotive, and construction with aluminum systems, structures and components. They provide a cost-efficient, effective production process for every customer they partner with. Whether the demand is fabricating, cutting, welding, product development, or design and engineering, Orrvilon can make it happen with high standards and top-notch quality.

With several patents to their name, Orrvilon has shown innovation and leadership in fabrication and manufacturing. They strive to be the best from concept to product delivery.

Orrvilon has been a great partner with the Career Center. They blazed the trail with our high school and adult education Welding Booth Sponsorship, as our first sponsor, helping provide our students with materials and equipment that is used at their company. They provide tours and visits during Manufacturing Day and are always willing to present to our students in lab and related classes.

Orrvilon hires current students and graduates from the Career Center and is always looking to add welders, quality control, general laborers, CNC operators, and project managers to their team.

“Orrvilon has been active in serving as guest speakers, providing employment for our students and offering to x-ray and pre-qualify welds for our students,” said CTE Supervisor Lynette Boggs. “This alone is huge for our students. We have also partnered with Orrvilon to provide professional development experience with our Materials Science lead teacher to expose them to their patented “metamic” material process.”

Congratulations, Orrvilon! We thank you for your continued support of our school and programs.
